

DENSI-PROOF

THE NAME SAYS IT ALL

Reproduced from The December 2008 Issue of Flooring Magazine which appeared in the Australian Made Flooring Products Special Feature

Protect Crete is an Australian manufacturer of one of the world's most technically advanced systems for permanent concrete repair, moisture proofing and protection treatments. Its extensive product range has been uniquely formulated to provide cost effective, safe and permanent solutions that will stand the test of time. Protect Crete is also a member of the **Australian Made Campaign** and, in line with its rules and guidelines, has had its products and processes recently audited by the **ACCC**.

"It gives consumers confidence in the Australian Made Campaign to know that they are so thorough and that they do follow up to check that their criteria are being adhered to," said Protect Crete's **John Daymond**.

"Nothing is taken for granted – you have to substantiate your claims for Australian content and manufacture and that has now given us an even better standing within the industry here in Australia. Of course our products easily complied and we are proud to be an Australian manufacturer, particularly as we now also export to other Countries throughout the World as well. We are also 100% Australian owned so all profits remain here in Australia."

Protect Crete's family of products includes:

Densi-Proof, which permanently waterproofs new or old concrete. Environmentally safe and user friendly, it will accept floor coverings or coatings after 24 hours.

Moisture-Fix 1 is a single pack (no mixing) ready to use, easy pour and broom spread applied liquid, that deeply penetrates, forming a non destructive colloidal gel, which provides a permanent moisture and vapour barrier that withstands hydrostatic pressure. Specifically formulated for the flooring installer in mind.

Moisture-Fix 2 for batten fixed and floating timber floors, loose laid carpet and vinyl and for carpet tiles fixed in pressure sensitive adhesive. It creates a barrier not just thinly on the surface of the subfloor but deeply, thick, complete and

permanent. With added Anti-microbial to ensure a bacteria, odour free and hygienic under floor environment.

Medi-Vet with Anti-microbial is manufactured specifically for situations requiring an anti-microbial safe guard. It provides a complete internal and surface barrier against animal and human fluid contamination.

Densi-Proof Cure and Seal can be used as a superior curing method on fresh concrete, providing protection against surface cracking and dusting. It is ideal for new or existing slabs to stop weeping water problems.

Reo Protect a permanent concrete waterproofer with an added ingredient for preserving embedded steel in existing concrete.

Surface Repeller provides water resistance for concrete and a wide variety of other surfaces.

Densi-Proof with Surface Sheen – a permanent waterproofer with a long lasting sheen for concrete applied at the time of pour.

Densi-Proof with Deep-Clean a permanent waterproofer with an added ingredient for deep cleaning old stained concrete.

Luster Keep and **Luster Shield** with Densi-Proof as a system gives total concrete protection to diamond polished or burnished concrete with an attractive high gloss, easy to maintain, low slip, tough as steel, stain resistant environmentally friendly finish.
