

## WHAT IS SO SPECIAL ABOUT SATELLITE?

We have created Satellite because we have listened to your demands for a machine that:

- Is reliable - So many machines need regular repair or maintenance and are expensive to repair.

**SATELLITE** is extremely robust. The transmission and the flexible disc coupling is virtually indestructible and comes with a 5 year replacement guarantee.

- Can flatten a floor beautifully yet grind a floor with a dish. Most large planetary grinders will gouge floors with very small undulations!

**SATELLITE** will produce a beautiful finish quality - it will flatten ripples and high spots, yet can grind a floor with a dish or shallow spoon. Excellent for polished concrete applications with phenolic (resin bond) diamond pads.

- Is very productive: with complex planetary systems that increase wear and tear, there is also a lot of the motor power used just to drive planetary drive disc systems, leaving less power to do the job.

**SATELLITE** Very little power is lost through our super tough transmission. Productivity is attained because of more power at the disc, and a large, low revving main disc with plenty of weight.

- Some machines are so complex they have to go to a manufacturer or distributor to be repaired **SATELLITE** Any part you could expect to work on, can be repaired onsite easily. Better still parts are available.

# INTRODUCING THE NEW SATELLITE DIAMOND GRINDERS & CONCRETE POLISHERS

## SATELLITE 480/550 Three Disc

Quick Disk change over - no tools!

### IDEAL FOR

- Grinding
- Polishing
- Levelling
- Cleaning
- Coating Removal
- Glue Removal
- Re-surfacing

**SATELLITE**
