

NEW! 250mm Diamond Grinder - **METEOR 250**

The Meteor 250mm Diamond Grinder is the latest range of specialised floor preparation equipment.

A lot of contractors are faced not with using the largest machine possible but having an aggressive but compact machine for small areas.

It is compact and easy to store, and loads into a Ute or van easily. It has no belts and pulleys, so all the power is available at the 250mm (10") disc.

Get within 20mm of walls with the close fitting shroud

To make it even more attractive the axle height is easily adjusted to give minimal drag for operator ease of use and the dust collection hose is controlled by a carrier loop which also doubles as a lifting eye.

Excellent for small areas on both commercial and domestic projects, glue removal and levelling high spots. **Meteor 250** can also use 7" PCD Diamond discs for glue & coating removal and polishing pads for producing polished concrete.

The **Meteor 250** also accepts sanding pads for finishing wooden floors!

- **AGGRESSIVE** – wide range of diamond tooling using 250mm Diamond Discs
- **ERGONOMIC** -Balanced operation to reduce operator fatigue.
- **COMPACT** -You can use it anywhere, easy to load onto a vehicle or up stairs. Foldable Handle for compact storage and transport.
- **WIDE RANGE OF TOOLING** - Uses 250mm (10") Diamond Discs for surface grinding. For removal of coatings, glue, concrete lips, and much more.
- **DIRECT DRIVE** - no belts and pulleys means it is virtually maintenance free prevents downtime!
