

3-phase Wet&Dry industrial vacuum cleaner - powerful, modular, innovative

Finally an industrial vacuum that can be modified and transformed in a very simple way - just adding options: cut-out for liquids, purge cleaning systems by cartridges, electric filter shaker, new accessories or bagging methods. Ideal for all kinds of applications - even the most sophisticated one.

The vacuum is made of four basic parts: chassis, filter chamber, waste bin and motor housing. The side-channel suction unit, made of aluminum casting, is fitted at the base of the chassis, giving more stability to the machine. The impeller is directly driven, thus avoiding any transmission and maintenance. The special diffuser decreases the speed of the exhaust air to less than 1m/s, in compliance with European regulations EN 60335-2-69. Moreover, the diffuser provides an optimum noise level of 69 dB (A). The vacuum gauge monitors filtration efficiency. The vac is provided with an external manual or internal electronic filter shaker - easy to use and ergonomic. The greater filter surface is obtained by means of a polyester star filter, 1.95 m<sup>2</sup> as filtering surface, L-class as standard.

The material is collected inside a 100 liter painted steel container provided with castors, easy to remove thanks to a handy release system. The machine frame is made of heavy duty tubular and plate steel, painted with epoxy powders to ensure robustness and is provided with a tool basket and cable holder. The tangential inlet allows a better cyclonic effect in presence of fine dusts. For better protection of the filter chamber in presence of abrasive materials, a reinforcement shield is fitted as standard on all the models. The manoeuvrability of the vacuum is granted by two fixed wheels (Ø 200 mm) - and by two swivel wheels - (Ø 150 mm) - provided with brakes and fitted with bearings.

#### PRODUCT FACTS

- Designed to increase productivity.
- Entirely made of steel.
- Equipped with a manual filter shaker (ATTIX 170).
- Equipped with an electronic filter shaker (ATTIX 170E).
- High airflow.
- Removable bin.
- Large filter surface.
- Side channel blower.
- Modularity.
- MultiFit adapter for optimized flexibility

Model	ATTIX 170
Ref. no	4030800229
Description	ATTIX 170E
<b>PRODUCT FEATURES</b>	
L VERSION	■
PHASE SEQUENCER	■
ELECTRIC FILTER SHAKER	■
MANUAL FILTER SHAKER	
RELEASE CONTAINER SYSTEM	■
STEEL CONTAINER	■
VACUUM METER	■
THREE PHASE LATERAL CHANEL BLOWER	■
<b>Technical specifications</b>	
VOLTAGE (V)	400
FREQUENCY (HZ)	50
IP PROTECTION CLASS	55
INSULATION CLASS	F
DUST CLASS	L
RATED POWER	4000
AIR FLOW RATE (L/M)	8600
VACUUM (MBAR/KPA)	300/30
WORKING SOUND LEVEL (DB-A)	73
CONTAINER CAPACITY ( L )	100
MAIN FILTER AREA (CM²)	19500
INLET (MM)	70
DIMENSIONS LXWXH (MM)	1250x650x1570
WEIGHT (KG)	192
