- ★ LONG REACH AND LOW PROFILE
- ★ 8" WHEELS FOR STAIR ACCESS
- ★ EASY TO MANOUVER

The 40cm Ultra High Speed Dominator, from Polivac International is the second addition to Polivac's highly successful electric burnishing range. The 1700RPM pad/brush speed achieves a fantastic "wet look shine and lustre", specifically designed for use in smaller, hard to maintain areas.

When in use, the Dominator is extremely quiet, utilising the successful In-built vacuum system. When you combine effective dust control with the quick release system for brushes or pads designed to follow the contours of a floor, an outstanding burnishing performance is achieved. With brilliant performance and efficiency the machine is perfect for schools, hospitals, hotels and smaller supermarkets and retail areas.

Due to the compact size, lightweight construction and additional 8" wheels for stairs, the Dominator is easy and comfortable to use. The adjustable handle, ergonomic hand grips and triggers with safety buttons also underline Polivac's commitment to ensuring occupational health and safety standards, are not only met but surpassed!

In true Polivac tradition, the long life floating skirt entraps the polish dust ensuring the vacuum system works effectively, leaving the floor free of dust. Protecting this skirt is a full wrap around bumper fitted to an extremely robust metal base, which has been powder coated for extra protection.

Of course, long life, durability and ease of service is built into every Polivac machine, and the 40cm Dominator is no exception.

The Dominator, is available with either the Quick Release System or a Rubbermaid Floating Pad holder.

▲ The Dominator also features the in built vacuum system, saving time in floor maintenance in addition to providing easy belt access for servicing.

The long lasting floating skirt traps all polishing dust leaving the floor free of debris.

▲ The Dominator is available with the Quick Release System, allowing brushes or pads to be used.
